Summary

- Design and build **LLM-powered** agents that take autonomous actions to complete real business tasks.
- Integrate agents with **external tools, APIs, databases**, and enterprise systems to automate end-to-end workflows
- Architect **multi-step planning and orchestration** logic that turns manual processes into reliable automated pipelines
- Implement **memory and retrieval-augmented generation (RAG)** to ground agent responses in accurate, relevant data

Technical Skills

- **Artificial Intelligence** : Open AI API, Claude AI, AI Agents, AI Workflow, NLP, LLM, RAG
- **Frameworks** : Node.js, Express.js, React.js, JWT, Auth, bcrypt, Socket.io, Material UI, Router, Hook, REST APIs
- **Programming Languages** : JavaScript, Python, Core Java, C++, HTML5, CSS3
- **Automation & Tools** : n8n, Git, GitHub, VS Code, Slack, Postman, Vercel, Render
- **Databases** : MongoDB, MySQL, Airtable

Technical Experience

StockPilot AI - AI-powered Restaurant Inventory Management System

July 2026 - Sep 2026

Tools : JavaScript, n8n, Open AI, Airtable, JSON, Gmail, Pathways, APIs

- **Chat-based updates**: Staff send simple messages on WhatsApp or Telegram to update stock.
- **AI-powered understanding**: The AI agent reads each message and extracts the item, quantity, and action (stock in, stock out, wastage)
- **Automatic storage**: All data is saved in Airtable in real time, with no manual entry.
- **Built on n8n**: Fully automated workflow that is flexible and easy to customize.
- **Low-stock alerts**: Instant notifications sent to WhatsApp or Telegram when items run low.
- **No learning curve**: No new app or dashboard for kitchen staff to learn.
- **Less wastage**: Better tracking helps reduce over-ordering and food waste.
- **Live visibility**: Owners and managers see up-to-date inventory anytime.
- **Multi-outlet ready**: Works for one restaurant or multiple branches.
- **Cost-effective**: Low running cost compared to traditional inventory software.

MailCraft AI - email AI agent system

May 2026 - July 2026

Tools : JavaScript, n8n, Email Validation, Open AI, APIs,

- **Email-based input**: Users simply send an email with their job position, with no app or login needed
- **Automatic email validation**: The system checks that the sender's email is genuine before doing any work
- **Human-written content**: AI creates a natural, personalized job profile that avoids a robotic tone
- **Tailored to the role**: Each draft is customized for the requested job position
- **Instant delivery**: The best draft is sent straight back to the user's inbox
- **Fully automated**: Runs 24/7 on n8n with no manual effort
- **Spam protection**: Validation filters out fake or invalid requests
- **Time-saving**: Gives job seekers a ready-to-use draft in minutes
- **Scalable**: Handles many users at the same time

DineVoice AI - AI-powered restaurant feedback agent

Jan 2026 - Feb 2026

Tools : n8n, Airtable, Slack, JavaScript, Open API, Gmail

- **AI sentiment analysis**: Automatically detects whether each review is positive, neutral, or negative
- **Topic tagging**: Sorts feedback into food quality, service, cleanliness, pricing, or wait time
- **Automatic storage**: Every response is saved in Airtable with no manual entry
- **Instant manager alerts**: Negative feedback triggers an immediate notification so issues get fixed fast
- **Personalized guest replies**: **AI sends a polite, human-like response to each guest**
- **Dish and staff tracking**: See which dishes, staff, or services guests love or complain about

Education

Silver Oak University

(2023 - 2026)

Bachelor of Computer Applications - CGPA - 8.2/10

Ahmedabad, Gujarat - 380001

Courses : Python, MongoDB, C++, JavaScript, Core Java, HTML, CSS, Flutter, Dart, C, UI-UX, IOT, AWS

Maktabah Jafariyah

(2021 - 2023)

Senior Secondary

Sedrana, Gujarat - 384151

Courses : Statistics, Account, Economics
